

Screwdriver by Snap-on. Multi-injection by Engel.

For professional users of hand tools, the name Snap-on stands for the ultimate in quality and innovation. So when it came to manufacturing their new soft-grip line, Snap-on turned to Engel for an innovative multi-component, insert molding solution.

Engel offers the industry's widest range of standard machines and specialized molding processes. As companies around the world look for innovative molding solutions that add value at every stage of manufacturing, Engel provides unmatched expertise in injection machine technology, machine control, automation and process technology.

If you're looking for a global partner who is willing to push the limits for your competitive advantage, call Engel or visit us at www.engelmachinery.com.
