

# Announcing the World's First Electric Tiebarless

## The Convergence of Two Great Technologies

Tiebarless and electric. The new Engel **e-motion** gives you the best of both worlds. Unbeatable precision, power efficiency and molding economics.

At Engel, for over 12 years we've been driving the evolution of tiebarless technology, to deliver lower operating costs and greater manufacturing versatility. Almost 15,000 applications, and counting.

Proven for its high precision – superior to that of any conventional tiebar machine – the Engel Tiebarless is the perfect platform for high-precision electric drive technology.

Add the advantages of servo electric drive – high speed, ultra-clean operation and the best shot-to-shot repeatability of any technology – and you've got the ultimate molding machine.

To find out what plugging in an Engel can do for your molding operation, call us. Or e-mail us at [sales@engel-ec.com](mailto:sales@engel-ec.com).
